

Neurophysiologisches Seminar

Sommersemester 2024

Conference
room
Ground floor,
Herzzentrum

Donnerstags 17:15 - 18:45
Face-to-Face & per Zoom-Konferenz
2 CME Punkte

25.04.24 Prof. Dr. Jürgen Konczak (School of Kinesiology, University of Minnesota, USA): „The interaction between proprioceptive and motor learning and how it transfers to untrained body segments.“

16.05.24 Prof. Dr. Opher Donchin (Department of Biomedical Engineering, Ben Gurion University of the Negev, Beer Sheva, Israel): „A theory of learning and unlearning in motor adaptation.“

23.05.24 Priv.-Doz. Dr. Jan Mehnert (Institut für Systemische Neurowissenschaften, UKE Hamburg): „The functional role of the cerebellum during nociception.“

13.06.24 Dr. Mari Sepp (ZMBH, Heidelberg University): „Development of the cerebellum through an evolutionary lens.“

20.06.24 Dr. Thiago Rezende (Neuroimaging Lab and Medical Physics Lab, University of Campinas – UNICAMP, Campinas, Brasil): „Neuroimaging in inherited cerebellar ataxias: methodological developments and clinical applications.“

27.06.24 Dr. Pierre-Louis Bazin (Full brain picture Analytics, Leiden, NL): „In-vivo cerebellar anatomy at the limits of analytic resolution.“

04.07.24 Prof. Dr. Xenia Kobeleva (Computational Neurology Group, Ruhr University Bochum & DZNE Bonn): „Computational Neurology- uncovering hidden information about the brain.“

11.07.24 Prof. Dr. Johannes Hebebrand (Department of Child and Adolescent Psychiatry, Essen University Hospital): „Hypoleptinemia as the trigger for the adaptation to starvation: relevant brain regions.“
