WELCOME NOTE

Dear Colleagues and Friends,

After the great successes of our previous meetings in 2015 and 2018, I would like to invite you to participate in the 3rd International Symposium on Tumor-Host Interaction in Head and Neck Cancer taking place in Essen, Germany from January 28–29, 2022.

We have been able to attract the world's leading experts on various emerging and relevant topics in head and neck oncology in order to discuss the most recent developments in the field. Our scientific program committee has compiled a state-of-the-art program (for updated information please visit our website: www.headandneck-symposium.de) that will provide you with a unique interdisciplinary conference experience:

- High-yield conference on experimental and translational head and neck oncology
- Covering topics from bench to bedside to stimulate a dialogue between basic scientists and clinicians
- Great mix between PhDs and MDs expected
- Hybrid daytime format with scheduling tailored to the needs of the post-covid era (short talks for in person presenters before noon, streamed invited talks for off-site international presenters in the afternoon)
- Opportunity for junior and senior scientists to present and discuss their work

We are convinced that this meeting will help to intensify international cooperation in the future. To accomplish this goal, we need you and your scientific input and therefore encourage you to submit abstracts to compile an up-to-date and informative program. You can find more information on abstract submission in this flyer.
